EDUCATION

The University of Texas at Austin

Aug. 2017 - Aug. 2023 (Expected)

M.S. - Ph.D. in Electrical and Computer Engineering

GPA: 3.84/4.00

Advisor: Prof. Joydeep Ghosh

The University of Edinburgh

May 2017

Bachelor of Engineering, Electronic Engineering

Graduated with First Class Honors

RESEARCH SUMMARY

I am interested in developing principles and practices of trustworthy machine learning. Specifically, I have been focused on (1) Uncertainty quantification: to better capture the epistemic uncertainty in common predictive modeling and classification problems. (2) Robustness: to strengthen the models defense on adversarial attack or distribution drift and provide a safety guarantee via constructing certified robustness. (3) Interpretability: to build human-understandable explanations for model decisions, with particular focus on non-i.i.d. data such as time series or sequential data.

PUBLICATIONS AND PREPRINTS

PROFESSIONAL EXPERIENCE

Google

Research Intern (Host: Dr. Xu Gao)

Sunnyvale, California

May 2022 - Sept. 2022

- Built different forecasting models to improve workload prediction at machine and VM level
- Developed effective reconciliation methods for time series with dynamically changing hierarchy

Intuit

Data Scientist Intern (Mentor: Dr. Jing Hu)

Mountain View, California

June 2021 - Sept. 2021

- Developed hierarchical time series forecasting models that improved forecasting accuracy
- Improved efficiency of forecasting pipeline by writing concurrent and multi-GPU program

Salesforce

Research Intern (Mentor: Dr. Jessica Lundin)

San Francisco, California

June 2020 - Aug. 2020

- Implemented state-of-the-art text style transfer models and designed a web-based UI for demo
- Researched on text style transfer on small and unbalanced dataset. Implemented a Bayesian task adaptive meta learning algorithm to fine-tune pre-trained language models

CognitiveScale

Applied Scientist Intern (Mentor: Dr. Suyog Jain)

Austin, Texas

May 2018 - Aug. 2018

- Implemented session-based recommendation algorithms and achieved state-of-the-art performance
- Lead a team project of 5 interns to research “Ethical AI” and pitched a business idea to company

PATENTS AND PROJECTS

1. Lundin, J., Schoppe, O., **Han, X.**, Sollami, M., Lonsdorf, B., Ross, A., Woodward, D., Rohde, S. (2022). Machine-Learning Based Generation of Text Style Variations for Digital Content Items. *US Patent 2022/0245322 A1*.
2. Multimodal Objective Sensing To Assess Individuals with Context, (2018); IARPA-funded project.

SELECTED AWARDS

B.Eng. First Class Honors (10% selection rate)

July 2017

Outstanding Graduates (3% selection rate)

June 2017

Edinburgh University Department Scholarship

2015-2017

China National Scholarship (2% selection rate)

2013-2014

INVITED TALKS

Hierarchical Time Series Forecasting at IIF Workshop on Forecast Reconciliation

2023

Mixture-of-Experts for Probabilistic Forecasts of Aggregated Time Series at Intuit AI

2021

Certified Monotonic Neural Networks at Salesforce Research

2020

ACADEMIC SERVICE

Conference Reviewer: ICLR 2020-2023; NeurIPS 2020-2023; AISTATS 2021-2023; ICML 2021-2023; IJCNN 2023; Journal Reviewer: Pattern Recognition

GRADUATE LEVEL COURSE WORKS

Probability and Stochastic Process, Convex Optimization, Data Mining, Information Theory, Deep Learning, Deep Probabilistic Modeling, Fair Transparent Machine Learning, Reinforcement Learning.

TECHNICAL STRENGTHS

Programming	Python, R (proficient); Java, Matlab, Verilog, C/C++ (knowledge of)
Tools	TensorFlow, PyTorch, TensorBoard, Scikit-Learn, Pandas, Numpy, Seaborn, Prophet, etc.
Specialty	Time-series, variational inference, generative models, transformers
Language	Mandarin, English, French (beginner)
Others	L ^A T _E X, Shell Script, ROS, SQL
